## **DETAILED ACTION**

### ***Information Disclosure Statement***

The IDSes filed 4/16/04, 6/16/05 and 10/17/05 have all been considered and placed of record. The initialed copies are attached herewith.

### ***Specification***

The disclosure should be carefully reviewed to ensure that any and all grammatical, idiomatic, and spelling or other minor errors are corrected.

### ***Drawings***

The drawings are objected to because all references to "no-load" is written as "lo-load." Furthermore, it seems Applicant expressly details all mathematical calculations in the flowcharts but fails to show the equivalent mathematic calculation for the equivalent charge resistance and the no-load voltage. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the

Art Unit: 2838

several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

Claims 1-40 are objected to because of the following informalities: In all the independent claims, Applicant expressly details all mathematical calculating algorithms but fails to show how the predetermined equivalent charge resistance data and effective no-load charge voltage data are calculated. It would further strengthen the claims if these algorithms were included in the claims. Appropriate correction is required.

### ***Conclusion***

This application is in condition for allowance except for the above formal matters. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
